Instructions for using the YCC diary spreadsheet

The workbook will automatically adjust from one year to the next.

DO NOT USE THE ORIGINAL FILE. COPY IT EACH YEAR.

Create a copy of the original file, NewBookings.xls called BookingsYYYY where YYY is the year to which the bookings relate.

Simply change the year on the January worksheet. This will automatically cause the year to change on all subsequent sheets and will cause days of the week to recalculate.

The worksheet for February has 29 days. If the year is not a leap year, highlight the 3 rows relating to the 29th day (this will show as March 1st) by clicking the row number of the topmost row and dragging the mouse down to the lowest row while holding down the left click button. On the menu bar, click on Edit, Clear, and All. The workbook is now ready to use.
